REDEFINE | REPLENISH | REALIZE

5- AMINO-1MQ

FAT LOSS + METABOLIC

OVERVIEW

5-Amino-1MQ is a small-molecule peptide that targets the enzyme NNMT, which is linked to slowed metabolism and increased fat storage. By blocking this enzyme, 5-Amino-1MQ helps the body burn fat more efficiently and improves overall metabolic function.

KEY BENEFITS

- ✓ Accelerates fat loss
- ◆ Increases cellular energy
- Supports metabolic rate
- ⊕ Enhances insulin sensitivity
- △ Helps reduce stubborn, diet-resistant fat

AOD-9604

FAT LOSS + METABOLIC

OVERVIEW

AOD-9604 is a modified fragment of human growth hormone (HGH) designed specifically for fat-burning without affecting blood sugar or IGF-1 levels. It stimulates the breakdown of fat while inhibiting the formation of new fat cells.

KEY BENEFITS

- ✓ Promotes rapid fat breakdown
- ◆ Helps reduce stubborn abdominal fat
- Supports natural metabolism
- ⊕ Improves recovery and joint comfort
- △ Does not affect blood sugar or hormone levels

SEMAGLUTIDE

FAT LOSS + METABOLIC

OVERVIEW

Semaglutide is a glucagon-like peptide-1 originally developed for diabetes management and now widely used for medical weight loss. It works by mimicking the body's natural GLP-1 hormone, which regulates appetite, blood sugar, and digestion.

KEY BENEFITS

- ✓ Supports weight loss
- ◆ Reduces appetite
- Improves blood sugar control
- ✚ Promotes gut health
- △ Decreases cravings

TIRZEPATIDE

FAT LOSS + METABOLIC

OVERVIEW

Tirzepatide is a dual GLP-1 and GIP designed to enhance metabolic function and support powerful medical weight loss. By activating both incretin pathways, it provides stronger appetite control, improved insulin sensitivity, and faster fat-burning results compared to single pathway GLP-1 medications.

KEY BENEFITS

- ✓ Reduces appetite
- ◆ Supports rapid weight loss
- Improves blood sugar control
- ⊕ Enhances insulin sensitivity
- △ Strengthens metabolic function

RETATRUTIDE

FAT LOSS + METABOLIC

OVERVIEW

most advanced next-generation metabolic Peptides, designed to activate three key hormone receptors: GLP-1, GIP, and Glucagon. This triple- agonist mechanism allows it to produce substantial weight loss results while also improving insulin sensitivity, glucose control, and overall metabolic function.

KEY BENEFITS

- ✓ Promotes rapid fat breakdown
- ◆ Helps reduce stubborn abdominal fat
- Supports natural metabolism
- ✚ Improves recovery and joint comfort
- △ Does not affect blood sugar or hormone levels

CARGRILINTIDE

FAT LOSS + METABOLIC

OVERVIEW

Cargrilintide is a potent amylin agonist that reduces appetite, slows gastric emptying, and improves glucose regulation. When combined with other metabolic peptides, it significantly enhances fat-loss outcomes and satiety.

KEY BENEFITS

- ✓ Reduces appetite
- ◆ Enhances satiety
- Improves glucose control
- + Supports fat loss Slows

THYMOSIN ALPHA-1

IMMUNITY & LONGEVITY

OVERVIEW

Thymosin $\alpha 1$ (T α 1) is a powerful immune-modulating peptide originally derived from the thymus gland. It enhances the body's natural defenses by supporting T-cell function, immune balance, and inflammation control. Thymosin $\alpha 1$ is widely used in functional and integrative medicine to strengthen immunity, improve recovery, and support overall wellness.

KEY BENEFITS

- ✓ Enhances immune defense
- ◆ Supports antiviral activity

NAD+

ENERGY, METABOLISM,

FOR LICENSED
HEALTHCARE
PROVIDERS ONLY

OVERVIEW

NAD+ (Nicotinamide Adenine Dinucleotide) is a vital coenzyme found in every cell of the body. It plays a central role in energy production, cellular repair, metabolism, and healthy aging. NAD+ levels naturally decrease with age, leading to fatigue, slower metabolism, inflammation, and reduced cellular function.

KEY BENEFITS

- ✓ **Increases cellular energy**
- ◆ **Supports anti-aging**
- **Enhances cognition**
- + **Promotes cellular repair**
- △ **Improves metabolism**

GONADORELIN

REPRODUCTIVE, FERTILITY,

OVERVIEW

Gonadorelin is a synthetic form of Gonadotropin-Releasing Hormone (GnRH), a hormone naturally produced by the hypothalamus. It stimulates the pituitary gland to release LH (Luteinizing Hormone) and FSH (Follicle-Stimulating Hormone)—two hormones essential for reproductive health, fertility, and proper endocrine function.

KEY BENEFITS

- ✓ Supports fertility
- ◆ Enhances hormone balance
- Improves reproductive function
- ⊕ Regulates LH/FSH

SLU-PP-332

WELLNESS + LONGEVITY

FOR LICENSED
HEALTHCARE
PROVIDERS ONLY

OVERVIEW

SLU-PP-332 activates ERR receptors, which regulate genes responsible for energy use, fat metabolism, and mitochondrial efficiency. By stimulating these pathways, the peptide helps the body shift into a more energy-burning, fat-utilizing state, even without intense exercise or prolonged fasting. This results in improved metabolic flexibility, better energy production, and enhanced endurance.

KEY BENEFITS

- ✓ Increases metabolism
- ◆ Supports fat burning
- Enhances energy
- ⊕ Improves endurance
- △ Boosts metabolic function

GLOW

WELLNESS + LONGEVITY

OVERVIEW

GLOW is a cosmetic-focused peptide blend designed to improve skin health, hydration, elasticity, and overall radiance. It targets the skin's structural proteins, supports collagen production, and enhances cellular repair. GLOW is often used in aesthetic and anti-aging programs to promote a smoother, brighter, and more youthful appearance.

KEY BENEFITS

- ✓ Enhances skin glow
- ◆ Supports collagen
- Improves hydration
- ✚ Refines texture
- △ Promotes skin repair
