5-AMINO-1MQ

FAT LOSS + METABOLIC

OVERVIEW

5-Amino-1MQ is a small-molecule peptide that targets the enzyme NNMT, which is linked to slowed metabolism and increased fat storage. By blocking this enzyme, 5-Amino-1MQ helps the body burn fat more efficiently and improves overall metabolic function.

KEY BENEFITS

- ✓ Accelerates fat loss
- ◆ Increases cellular energy
- Supports metabolic rate
- ⊕ Enhances insulin sensitivity
- △ Helps reduce stubborn, diet-resistant fat

AOD-9604

FAT LOSS + METABOLIC

OVERVIEW

AOD-9604 is a modified fragment of human growth hormone (HGH) designed specifically for fat-4 burning without affecting blood sugar or IGF-1 levels. It stimulates the breakdown of fat while inhibiting the formation of new fat cells.

KEY BENEFITS

Promotes rapid fat breakdown

Helps reduce stubborn abdominal fat

Supports natural metabolism

Improves recovery and joint comfort

Does not affect blood sugar or hormone levels

SEMAGLUTIDE

FAT LOSS + METABOLIC

OVERVIEW

Semaglutide is a glucagon-like peptide-1 originally developed for diabetes management and now widely used for medical weight loss. It works by mimicking the body's natural GLP-1 hormone, which regulates appetite, blood sugar, and digestion.

KEY BENEFITS

Supports weight loss

Reduces appetite

Improves blood sugar control

Promotes gut health

Decreases cravings

TIRZEPATIDE

FAT LOSS + METABOLIC

OVERVIEW

Tirzepatide is a dual GLP-1 and GIP designed to enhance metabolic function and support powerful medical weight loss. By activating both incretin pathways, it provides stronger appetite control, improved insulin sensitivity, and faster fat-burning results compared to single pathway GLP-1 medications.

KEY BENEFITS

- ✓ Reduces appetite
- ◆ Supports rapid weight loss
- Improves blood sugar control
- ✚ Enhances insulin sensitivity
- △ Strengthens metabolic function

RETATRUTIDE

FAT LOSS + METABOLIC

OVERVIEW

most advanced next-generation metabolic Peptides, designed to activate three key hormone receptors: GLP-1, GIP, and Glucagon. This triple- agonist mechanism allows it to produce substantial weight loss results while also improving insulin sensitivity, glucose control, and overall metabolic function.

KEY BENEFITS

Supports weight loss

Supports metabolic function

Improves insulin sensitivity

Supports glucose control

Supports appetite regulation

CARGRILINTIDE

FAT LOSS + METABOLIC

OVERVIEW

Cargrilintide is a potent amylin agonist that } reduces appetite, slows gastric emptying, and improves glucose regulation. When combined with other metabolic peptides, it significantly enhances fat- loss outcomes and satiety.

KEY BENEFITS

- ✓ Reduces appetite
- ◆ Enhances satiety
- Improves glucose control
- ⊕ Supports fat-loss goals
- △ Slows gastric emptying

OVERVIEW

MOTS-C is a mitochondrial- derived peptide that plays a key role in energy regulation, metabolic : balance, and cellular stress protection. It helps the body use glucose more efficiently, improves mitochondrial function, and supports overall metabolic health. MOTS-C is widely used in longevity and performance medicine for its ability to enhance energy, endurance, and resilience | ve, { fe FBVIC

KEY BENEFITS

- ✓ Enhances energy
- ◆ Improves metabolism
- Supports fat oxidation
- ⊕ Boosts endurance
- △ Promotes cellular health

MGF

ENERGY + METABOLISM

OVERVIEW

MGF (Mechano Growth Factor) is a splice variant of IGF-1 that is released by muscle tissue in response to stress, damage, or resistance training. It plays a critical role in muscle repair, recovery, and growth, making it a popular peptide in performance, rehabilitation, and longevity protocols.

KEY BENEFITS

- ✓ Supports muscle repair
- ◆ Supports recovery
- Supports tissue regeneration
- ✚ Supports training adaptation
- △ Supports cellular repair

DSIP

SLEEP + RECOVERY

OVERVIEW

DSIP (Delta Sleep-Inducing Peptide) is a naturally occurring. neuropeptide known for its ability to promote deep, restorative sleep and regulate the body's stress response. DSIP is used in wellness and integrative medicine for sleep optimization, anxiety reduction, and improvement in overall recovery

KEY BENEFITS

- ✓ Supports deep sleep
- ◆ Reduces stress
- Enhances recovery
- ⊕ Improves sleep quality
- △ Promotes relaxation

GONADORELIN

REPRODUCTIVE + FERTILITY

OVERVIEW

Gonadorelin is a synthetic form of Gonadotropin-Releasing Hormone (GnRH), a hormone 4 naturally produced by the hypothalamus. It stimulates the pituitary gland to release LH (Luteinizing Hormone) and FSH (Follicle Stimulating Hormone)—two hormones essential for reproductive health, fertility, and proper endocrine function.

KEY BENEFITS

- ✓ Supports fertility
- ◆ Enhances hormone balance
- Improves reproductive function
- ⊕ Regulates LH/FSH
- △ Supports vitality

SLU-PP-332

WELLNESS + LONGEVITY

OVERVIEW

SLU-PP-332 activates ERR receptors, which regulate genes responsible for energy use, fat : metabolism, and mitochondrial efficiency. By stimulating these pathways, the peptide helps the body shift into a more energy-burning, fat- utilizing state, even without intense exercise or prolonged fasting. This results in improved metabolic flexibility, better energy production, and enhanced endurance. belle vie

KEY BENEFITS

- ✓ **Increases metabolism**
- ◆ **Supports fat burning**
- **Enhances energy**
- ⊕ **Improves endurance**
- △ **Boosts metabolic function**

VIP

WELLNESS + LONGEVITY

OVERVIEW

VIP (Vasoactive Intestinal Peptide) is a regulatory neuropeptide involved in immune ; balance, anti-inflammatory control, lung function, and neurological health. It plays a key role in maintaining healthy immune responses, reducing inflammation, improving circulation, and supporting cognitive function.

KEY BENEFITS

- ✓ Supports immune modulation
- ◆ Enhances cognition
- Promotes blood flow
- ⊕ Reduces inflammation
- △ Improves recovery

GLOW

WELLNESS + LONGEVITY

OVERVIEW

GLOW is a cosmetic-focused peptide blend designed to improve skin health, hydration, : elasticity, and overall radiance. It targets the skin's structural proteins, supports collagen production, and enhances cellular repair. GLOW is often used in aesthetic and anti-aging programs to promote a smoother, brighter, and more youthful appearance.

KEY BENEFITS

- ✓ Enhances skin glow
- ◆ Supports collagen
- Improves hydration
- ✚ Refines texture
- △ Promotes skin repair
